

HEALTH & SAFETY POLICY

Electropoli is a European leader in surface treatment

Electropoli recognizes people as its most important value and is committed to a safe and healthy work environment impacting those working on, visiting or living near our operations.

As an integral part of managing the business, managers – at all levels – are accountable for managing workplace health and safety with strong leadership and credibility. At the same time it is the duty of every employee to work in a safe manner so as not to endanger himself / herself or his/her colleagues at work and during travel.

Our Vision

Protecting our employees by eliminating all health and safety risks is a key priority for our company.

Our Mission

Bring safety on top of mind for all employees and integrate it with all business processes.

The company's senior management recognizes the importance of safety to achieve and sustain excellence in our businesses; therefore, with the cooperation of all employees, we endeavour to continually improve our HS Management System by committing to:

- Comply with all applicable health and safety legislation and other safety requirements to which the company subscribes
- To apply the Group's Health and Safety strategy
- Improve the ergonomics of employees' work
- Ensure safety during transport activities
- Report all incidents, accidents, and near misses in line with reporting requirements, including thorough investigation, follow-up and communication of lessons learned
- Insist that when employees identify potential hazard, which could result in injury and/or health problems, they will inform the organisation of the circumstances and if no change occurs, they will remove themselves from the hazard
- All directors and managers will demonstrate leadership in health and safety to develop and maintain a positive safety culture
- Help employees achieve our health and safety objectives and provide relevant health and safety information, training and instructions to our employees
- Ensure that contractors and other third parties entering Electropoli sites have sufficient relevant information and training and are properly equipped to perform their tasks safely.
